

## PRESS RELEASE

### ECOBONUS 110%: EDILIZIACROBATICA IS THERE

Iovino: "The implementing decree is still missing, but we're ready to go."

EdiliziAcrobatica S.p.A., the first Italian company in the field of double safety rope operating in the construction sector, confirms that, despite the absence of an implementing decree concerning the procedures that will regulate the Ecobonus by 110%, it has already set in motion to be operational the day after the publication in the Official Journal of the Decree itself.

"In these days - explains Riccardo Iovino, founder and CEO of EdiliziAcrobatica - we have received many requests, from all over Italy, from condominium administrators and private citizens who choose our services for the renovation of their homes. All, equally, are anxious to be able to carry out the works that, according to what the Government has so far provided, will benefit from the Ecobonus. While waiting for the Implementation Decree that will illustrate the terms and conditions of the incentive, we have set up an internal task force, as EdiliziAcrobatica, which is already committed to accept these requests and ensure the immediate operation, throughout Italy, in accordance with the Government's provisions. Given these premises, our effort, also from a technical point of view, is aimed at ensuring our services and, as soon as possible, i.e. when the Implementing Decree will be in force, give our customers the opportunity to take advantage of the 110% bonus".
