

PRESS RELEASE

OPENS IN LECCE THE FIRST POINT OF EDILIZIACROBATICA

Lecce - Has opened its doors and is already fully operational with some interventions in the area, the first Acrobatic Point in Lecce. It is a franchising point of EdiliziAcrobatica S.p.A., a leading company in Italy in double safety rope building works, such as maintenance and renovation of buildings and other architectural structures, strongly supported by the Lecce entrepreneur Stefano Gianturco. Already operating in the building sector, Gianturco has chosen the affiliation to EdiliziAcrobatica to bring to the territory the know-how and skills that have made the group known throughout the country, where it now has 81 direct and franchising offices in Italy and 6 in France.

"At present - Gianturco commented - EdiliziAcrobatica Lecce consists of 5 units, 2 of which are ropeway operators. However, our aim is to introduce 18 new resources by the end of the year among workers and commercial operators, thus offering the citizens of Lecce new job opportunities".
