SIT released a two-speed 1H23 sales trend: Heating and Ventilation (74% of total revenues) down 21.8% and Metering (25.4%) up 24.1%. Group profitability sharply decreased. Despite the current changes in the overall heating sector, we believe that the company is going to reinforce its business in the expected growing segments.

The 1H23 top line was weak, mainly impacted by a slowdown in the group's reference market. In this backdrop, the group is implementing a series of strategic actions, reviewing operating processes and implementing a cost optimisation program. We confirm our BUY rating on the stock, which is trading at compressed multiples (EV/EBITDA of 3.0x and 2.2x in FY23 and FY24, respectively, at around a 50% discount to main peer Alkemy), reflecting we acknowledge the still low visibility on the group's top-line rebound.

Valuation methodology (long-term horizon: 12M)

The Intesa Sanpaolo SpA Equity Research Department values the companies for which it assigns recommendations as follows:

We obtain a fair value using a number of valuation methodologies including: discounted cash flow method (DCF), dividend discount model (DDM), embedded value methodology, return on allocated capital, break-up value, asset-based valuation method, sum-of-the-parts, and multiples-based models (for example PE, P/BV, PCF, EV/Sales, EV/EBITDA, EV/EBIT, etc.). The financial analysts use the above valuation methods alternatively and/or jointly at their discretion. The assigned target price may differ from the fair value, as it also takes into account overall market/sector conditions, corporate/market events, and corporate specifics (i.e. holding discounts) reasonably considered to be possible drivers of the company's share price performance. These factors may also be assessed using the methodologies indicated above.

Equity rating key: (long-term horizon: 12M)

In its recommendations, Intesa Sanpaolo SpA uses an "absolute" rating system, whose key is reported below:

Equity Rating Key (long-term horizon: 12M)

Long-term rating	Definition
BUY	If the target price is 10% higher than the market price.
HOLD	If the target price is in a range 10% below or 10% above the market price.
SELL	If the target price is 10% lower than the market price.
RATING SUSPENDED	The investment rating and target price for this stock have been suspended as there is not a sufficient fundamental basis to determine an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock.
NO RATING TENDER SHARES	The company is or may be covered by the Research Department but no rating or target price is assigned either voluntarily or to comply with applicable regulations and/or firm policies in certain circumstances. We advise investors to tender the shares to the offer.
TARGET PRICE MARKET PRICE	The market price that the analyst believes the share may reach within a 12M time horizon. Closing price on the day before the issue date of the report, as indicated on the first page, except where otherwise indicated.
Note	Intesa Sanpaolo assigns ratings to stocks on a 12M horizon based on a number of fundamental drivers including, among others, updates to earnings and/or valuation models; short-term price movements alone do not imply a reassessment of the rating by the analyst.
