

PRESS RELEASE

EDILIZIACROBATICA SPA JOINS THE UNITED NATIONS GLOBAL COMPACT

Genoa, 26 April 2021 – EdiliziAcrobatica S.p.A., a leading company in Italy and Europe in the field of rope access construction, present in Italy and France with over 100 operating areas employing over 1,100 people, has signed an agreement with which it commits to achieve the objectives of the United Nations Global Compact (UNGC), an initiative joined by several thousand companies worldwide and that offers leadership guidelines aimed at inspiring sustainable policies in full respect of corporate social responsibility.

With this signature, EdiliziAcrobatica has committed to adopt the ten principles dictated by the United Nations in the fields of human rights, social standards, the environment and the fight against corruption. Joining the UNGC thus underscores EdiliziAcrobatica's long-term commitment to sustainability and corporate social responsibility.

"The choice to join the United Nations Global Compact for the Environment", commented Riccardo Iovino, CEO and Founder of EdiliziAcrobatica, "is in line with the commitment we made as a company from our founding to contribute concretely to the protection of our planet through the adoption of a technology with low environmental impact, which is in fact the double safety rope that we use every day. Indeed, just this year EdiliziAcrobatica launched its ESG - Environment, Social and Governance project with which it is even more committed to pursuing ethical objectives through the adoption and implementation of best practices".

"EdiliziAcrobatica promotes and encourages policies of equality contrary to all types of discrimination of sex, race, religion and political orientation", explained Anna Marras, partner and director with responsibility for human resources at EdiliziAcrobatica. "Our company employs men and women from different parts of the world who practice different religions and who are perfectly integrated, feeling part of a family – our family – where each person is considered invaluable".

EdiliziAcrobatica SpA is the leading company in Italy in the construction sector operating with double safety ropes. Founded in Genoa in 1994 by Riccardo Iovino, the company now has over 1,000 employees and 100 operating areas in Italy and France. The technique it employs allows working without scaffolding or aerial platforms, thus offering end customers a quality service and the elimination of scaffolding costs. The rope access that EdiliziAcrobatica is specialised in is particularly well suited to ordinary and extraordinary maintenance of buildings and apartment complexes, hotels and historical monuments. In fact, the technique developed by EdiliziAcrobatica ensures numerous benefits both in terms of accessibility for apartment complex residents and hotel guests and safety for tenants and access to monuments that always remain accessible even during restoration and maintenance works.

Listed on the AIM Italia stock exchange since November 2018 and on the Euronext Growth market in Paris since February 2019, EdiliziAcrobatica closed 2020 – the year of the pandemic and the stoppage of construction sites – with €44.8 million in revenues, up 14% compared to 2019. During the year the company also inaugurated a new business line dedicated to cleaning and disinfection and released EAcondominio, the first app in Italy for condominium administrators to facilitate the holding of remote tenant meetings.

UN Global Compact: The United Nations Global Compact was founded in 2000. It is considered “the largest strategic corporate citizenship initiative in the world” and stems from a desire to promote a sustainable global economy. It was first proposed in 1999 at the World Economic Forum in Davos by then-UN Secretary Kofi Annan. To date more than 13,000 companies from over 160 countries around the world have joined.
